RETROFIT LED LIGHTS

SMARTHOME
SOLUTIONS

J&K Security Solutions offers a variety of Retrofit LED lights to fit your home or office. LED bulbs are more expensive, but they do tend to last more than 45,000 hours longer. A \$39.00 LED bulb will on average pay for itself in less than 15 months, and then you have the continued savings on your electric bill.

BENEFITS

Traditional incandescent light bulbs can account for up to 25% of the average home energy budget. LEDs can use as little as 1/30th of the amount of energy consumed by traditional incandescent light bulbs, reducing energy costs by 80% or more.

The typical lifespan of an LED light bulb is 100,000 hours. That is 10 times longer than compact fluorescents and 100 times longer than traditional incandescents.

LED Retrofit Lamps

LR4E -15 Recessed Retrofit

If an LED were to be left on all day, everyday, it would last around 5.5 years!

Over its lifespan, an LED can replace approximately 40 incandescents.

LEDs are manufactured without using mercury, so they are safe for the environment.

Unlike traditional incandescent light bulbs that are made using a filament, LEDs are filament-free and are not damaged under circumstances that would damage an incandescent bulb.

The U.S. Department of Energy estimates that over the next 20 years, \$265 billion will be saved by using LED lighting.

Imagine being able to adjust the temperature of your house, dim the lights and turn on your favorite song all with the touch of a button. J&K Security Solutions specializes in integrating all your favorite electronics into one device to give you total control.

CONTROL4 HOME CONTROL

Control4 makes controlling every aspect of your home carefree. Whether it's climate, audio, or lighting, it's all possible with the touch of a button – from anywhere in the world!

Climate Control

Climate Control is a great solution for your home and ideal for summer cottages and vacation homes. Climate Control exchanges up-to-the-minute consumption data, allowing you to monitor temperatures and avoid frozen pipes in the winter. You can also prepare your house or vacation home for your arrival by turning on the lights and the heat or air conditioning before you even get there!
